OLD IZAAK.

The Thames is still out of condition for angling. The rain has somewhat refreshed the river, but much more will be needed before good sport can be expected. The tidal water has yielded some fair fish, and a large quantity of roach and dace are reported from Richmond and Twickenham. At Teddington M'Bride's natrons have chiefly had bream, barbel, and perch, and 14 of the perch weighed 11lb. altogether. A roach of 14b. was also caught.

Kingston is again to the fore, and N. Bolton reports taking 340 roach and dace in 3 days, some of the roach weighing over 11b. each. Wilkes, Johnson, and Knight also record good takes, and I am not surprised that a re-stocking association is supported in the district. A nice trout of about 14b., caught by Lewis Gibson, of Putney, was put in the river there on Saturday by Mr. Alderman Nuthall on behalf of the Thames Angling Preservation Society, who have from time to time thanklesely turned quantities of fish into this part of the Thames.

of fish into this part of the Thames.

The Lea returns are again disappointing, and seem likely to remain so until more rain happens, and the condition of the water improves. Some good jack have been had from the Arnn at Pulborough, among them one of 13lb, and 3 others scaling 17lb. together, taken by Mr. H. Palmer, of the Anchor and Hope. A member of the Battersea Friendly Anglers, whose name has not reached me, took 45lb.

Poresters' Hall, Clerkenwell. The chair will be taken at 8.30 p.m.

A jack of 37lb. was taken from Sir Walter Barttelot's ground at Pulborough by Mr. Allen, of Hereford, on Monday last and its weight duly verified. Many others have been taken in the locality of late.

GENERAL CHATTER.

From Hanwell, several indignant letters have reached me, commenting on the digracefully insanitary condition of the River Prent. Protence is made, they state, that the horrible made, they state, that the horrible made, they state, that the horrible stench given off by the black water really comes from the disinfectants which are employed for its purification. If that be the case, I can only say that the remedy is almost as bad as the disease. But it is news to me that any disinfectant has the odour of sewage At all events, it is a shame and a scandal that a thickly-populated locality should be subjected to such an aboum inable nuisance.

Salisbury and his colleagues. What is even worse, the same view would assuredly he taken by foreign Governments, and might easily lead to grave embarrasements, and occasion when all other considerations even dangers. There was never an occasion when all other considerations should have more given place to patriotism. There are, we know, many cross issues at Deptford, especially in connection with the engineering strike. But every Unionist elector who deserves the name will dismiss these petty matters from his mind, and strive as hard as he can to demonstrate to unfriendly nations that Englishmen will not give them any help, even indirectly at a bye-election, by diminishing the prestige of their own country. That the seat can be retained admits of no question whatever: but the Radicals and Socialists have been working desperately hard, while the Unionists nave been taking things easily, and it rests with the latter to recover their lost ground to-morrow, by "a long puli, a strong pull, and a pull altogether."

THE PREMIER IN THE CITY.

THE PREMIER IN THE CITY.

Lord Salisbury has often made a longer speech than that which he delivered at the Lord Mayor's banquet on Tuesday night, but he has never spoken to better purpose. His defence of his policy on the Eastern question was convincing and complete. It is the fashion in certain quarters to cast ridicule upon the Concert of Europe, and to pretend, when the matter is treated seriously, that it is only a sham; it does not attempt the impossible, therefore it does nothing, and is worth nothing. That line of only a sham; it does not attempt the impossible, therefore it does nothing, and is worth nothing. That line of argument breaks down immediately, if people will only look at facts. The European Concert is, as Lord Salisbury observed, like a British jury; it can only act when it is unanimous. If any one Power, differing from the rest, were to take action upon its sole responsibility there would be trouble at once. This implies that the action of the Concert must be slow. It can never be an easy task to bring six Governments to think alike upon a score of questions of detail. But it does not follow because the European Federation is a slow-moving body.

Lord Salisbury just now was a clear statement as to what the Government mean to do to uphold British interests in West Africa, and it has got it. We do not want to take territory in Africa or elsewhere, merely for the pleasure of colouring with red blank spaces in the map, but we want to extend our trade, to open up new martend our trade, to open up new martend, in place of those which the selfish policy of our rivals is closing to us almost deily, and we do not mean to be baulked in that legitimate ambibury has averted this danger, which had come a little too close to be quite pleasant, by speaking the right word at the right moment.
